

Questions from Friends of Cathedral Park 7/12/05

Where do you find quarry manager? UDAC?

Does the study include downstream study? What is the extent of the sampling? Do you use a grid?

Four alternatives for T4? Do Actions involve current plan for T4? Concerned about PDX Portland's preferred choice because of the diversity of problems here. Also, our geologic problems are different than their sample location in Washington. Is the decision a done deal? Is there a problem due to the aquifer?

In pictures of Willamette Valley, it looks like the slip + all the water is at great risk for earthquake - turns to liquid because of soil + sediment. How does this increase risk? Some the Port going to be making a profit on the containment location? Will other sediments be dumped there?

Relationship between DEQ, EPA + industry - What level of comfort do you have to have for the port to move forward? How do you lead the business to do the right thing?

Is the Dept. of Geology involved? Who do we talk to about geologic concern?

USEPA SF

1436741

Who will monitor T4 to ensure nothing is or will further escape into the River?

What type of comments should DTS receive?

Kids/families /low income/ethnic folks use the river for food.  
What kind of outreach to them do you do? Are you involved with the Multnomah Co. health clinic? Do you do door hanging for information?
